

2010 Spring Break Camps
March 29, 30, 31 and April 01, 02, 03

Endangered Means There is Still Time!

What does the Manatee, Panther, and Alligator have in common with the Great Toad, Spectacled Caiman, and the Python? Other than occupying the same space – NOTHING!

Florida’s ecosystems are unique. Groups of animals and even plants that are not a part of the original Florida change the ocean and landscape, and make life miserable for our native inhabitants, especially our endangered species of which Florida has more than any other state in the continental United States.

Bring your curiosity and your investigative powers to find out what is happening today in Florida and what are some of the ways we can help stop natural habitats from being destroyed.
